

LITHOSPHERE 2018 SYMPOSIUM

THE TENTH SYMPOSIUM ON STRUCTURE, COMPOSITION AND EVOLUTION OF THE LITHOSPHERE IN FENNOSCANDIA

November 14-16, 2018

Oulu, Finland

The National ILP Committee of Finland organizes the 10th Lithosphere Symposium at the Linnanmaa campus of the University of Oulu, Finland, during Nov. 14-16, 2018. The symposium is aimed for all geoscientists studying problems of the lithosphere in general, and the Fennoscandian lithosphere in particular. The language of the symposium is English.

The symposium has the following themes:

- Fennoscandian lithosphere from upper crust to asthenosphere
- Precambrian and Phanerozoic evolution of Fennoscandian lithosphere
- 3D and 4D modeling of lithosphere structures and evolution
- Orogenies: Structure, deformation, magmatism and metamorphosis
- Neotectonics, seismicity, deglaciation and postglacial uplift of Fennoscandia
- Natural resources and metallogeny
- Scientific drilling projects in Fennoscandia
- Seismic studies of lithosphere structures
- Short communications and briefings on new and on-going projects

The program will consist of oral and poster presentations and short communications. An abstract volume will be published in the Report Series of the Institute of Seismology, University of Helsinki (also available in the web). Student posters are evaluated and the best poster will be rewarded.

Detailed information on the program, registration, practicalities and instructions for writing the extended abstracts can be found at <http://www.seismo.helsinki.fi/ilp/lito2018/>.

Participation fee is 100 € (students 30 €) and it includes the symposium publication, the lunch, coffee/tea service during breaks and the ice-breaker party.
